Map Based Teacher Credentialing in the United States – Client Side

Abstract

As we know there are 50 different states in USA, and each state have different requirements of teacher credentialing. Languages being taught in different states depend on the requirements of that particular state. Each state has different requirement to get credentialing in world languages. For any aspiring teacher, it requires quality of effort and time to collect the teacher credentialing information for particular state. The thesis mainly focuses on user interface in a teacher credentialing website. The user interface will provide information related to requirements for different categories and information related to different type of examinations for teacher credentialing.
