Front/Back End, Middleware, and Database

This is an opportunity of a lifetime. Do you want to be a part of a start up where you can make a difference? Do you want to change the status quo? At Hypercon Global we are a mobile advertising company that is out to change the advertising landscape forever. This is your chance to get in on the ground floor. You will help us develop our web platform, responsive web app, and create complete software architecture from scratch. We have a high level advisory team in place to help us grow all along our path to success. You will be one of a few in a company and this is your chance to make the rules, build programs how you want, and have huge growth potential.

Qualifications:

-Preferable languages knowledge Ruby on Rails,Python, Djengo, JavaScript, MySQL, Apache(Hadoop), HTML5, Memcache, and Linux or equivalent
-Previous iOS development
-Technical expertise in high performance website systems, web services
- Language and performance tuning/scaling, and quality assurance techniques
- web development experience with superior web coding/mobile skills
- Expert knowledge of SQL databases, web servers and performance optimization
- Ability to set and meet deadlines and work in a startup environment
-Team player who has a track record of success coupled with a can do attitude
-Previous start up experience is preferred
-Ability to work in the US and are already a resident.
- Specify, implement & lead development environment, processes & systems
- **Lead implementation effort, including hands-on coding**

Compensation: Equity only.

Please include a link to some of your work. Also if you have worked with any UX/UI designer who produces top quality work please refer them to us as we are looking for some of them too.
