

Do you have experience with JavaScript / Front-end web development with Apache Cordova (PhoneGap) and looking for a chance to help lead development of an mobile application as part of a small, high-energy startup team?

We are a Carlsbad based startup getting ready to launch an exciting mobile application for a new way of delivering messages. The designs and concepts are complete and your first job would be to help develop a proof of concept prototype.

We are looking for someone who fits the following profile:

- Has experience building web application front-ends using a combination of HTML5, CSS3, JavaScript and jQuery
- Has some experience leveraging a front-end MVC framework such as Apache Cordova (PhoneGap) to build HTML5 mobile applications
- Has experience with database systems such as MySQL
- Has experience developing HTML5 Hybrid applications on iOS and Android platforms.
-

If this sounds like you; you need to respond!

Here's what we have to offer:

- Flexible work hours (this could be 2nd job)
- Work from home or any location.
- A high degree of autonomy and flexibility to help us build the best product we can
- An opportunity to make your mark on a product
- A chance to be one of the first employees of a company poised to see explosive growth in the year ahead
