CS Masters' Thesis Defense

Title: *CIBER Measurement Repository*
Speaker: SACHIN JAIN
Date: Thursday, November 17, 2011
Time: 8:30 p.m.
Location: GMCS 405
Thesis advisor: Dr Carl Eckberg

Abstract:
The objective of my thesis is to enhance the Measurement Repository for the Center for International Business Education and Research (CIBER). This Repository is a one-stop unique web portal to assist with the construction, discussion and dissemination of measurement constructs in international business research. It has been enhanced using open source web technologies like PHP, MySQL, JavaScript and Ajax. Several features have been integrated as a part of this thesis like Advanced Search, Registration portal, Input Section for researchers to enter their research work in Repository and Forum for researchers to share their experience with the measure.
