

CDM Technology

Social Media Internship

We are looking for a college student, preferably one that is looking to graduate with a Computer Science Degree, who wants to come be our “Social Media Intern” for 10-15 hours a week. We need help engaging interactions with the public through social media posts — We want this person to create and curate social media content for our various social media channels, and assist our 2 founders in creating and executing marketing campaigns.

- Create engaging interaction with public through social media posts
- Participate in design
- Participate in marketing campaigns
- Creative marketing ideas
- Consumer research
- Content marketing
- Write a monthly newsletter, covering IT trends both Locally and Nationally, trends that we at CDM Technology are seeing in the marketplace, in addition to fun and exciting things you are finding on the web as it relates to Technology.
- Take over our various social media platforms, and grow the number of followers.
- Research and track technology releases, whether it be computer, phone, gadgets, etc.
- Research Local and National Technical Hiring trends.

Our goal is to substantially increase our social media presence, gather as many "Technology" driven followers as we can, and ultimately engage them when our clients are leaning on us for IT Human Capital resources.

Job Type: Part-time
