Job Title: IT Intern - Summer 2015

Company Profile

Oceaneering is a global oilfield provider of engineered services and products primarily to the offshore oil and gas industry, with a focus on deepwater applications. Through the use of its applied technology expertise, Oceaneering also serves the defense and aerospace industries. Oceaneering’s business offerings include remotely operated vehicles, built-to-order specialty subsea hardware, deepwater intervention and manned diving services, non-destructive testing and inspections, mobile offshore production systems, and engineering and project management.

Essential Duties and Responsibilities include the following. Other duties may be assigned.

Summer 2015 Internship positions at Oceaneering will provide opportunities to gain experience in the "real world" work environment. The student will typically be assigned a mentor who will direct their summer experience. Work or project assignments (some with strict deadlines to meet) will be commensurate with the student’s academic background to take advantage of their expertise and provide real life application of their classroom knowledge. At the same time, opportunities will be provided for students to expand their knowledge outside the boundaries of their classroom.

Looking for a bright, quick intern who will be tasked with expanding our historical audit capabilities to include all lookup and system tables application wide. They will use SQL Server Management studio, build stored procedures, user defined functions, and reports based on an existing development pattern. This is a great opportunity to learn about historical data auditing (from a business use perspective), report authoring, SQL development, Agile development, and the software development lifecycle.

Education and/or Experience

- Authorized to work for any employer in the U.S. on a full-time, indefinite basis without need for sponsorship now or in the future
- Computer Science major - at least 15 units into upper division CS
- Should have completed at least 1 SQL programming class, and have beginner capabilities in SQL coding
- Should have completed at least 1 compiled language programming class, and have beginner capabilities in C#.NET
- HTML/CSS/Javascript/jQuery experience a plus
- Paper resumes will not be accepted. All job seekers must go to the web site to be considered for positions
