Glacier Water, the world leader in water vending, has a full-time opportunity coming available in the Jan/Feb 2015 timeframe for a senior software engineer in Vista, CA. Technologies used are C# and/or VB .NET, MS SQL Server, web, etc. Native Android exp. would be a big plus, but not essential (interest in learning would be, though). If you or someone you know is looking, and is authorized to work in the U.S., please reply to this email address: tim.bochard@glacierwater.com. I would be happy to send more information.

Tim Bochard, Director IT, Glacier Water
