**Intern, Database Design & Administration – Job Posting**

You are innovative – dynamic – forward thinking - passionate - challenging the norm. Our candidates must be self-motivated team players, problem-solvers who thrive in a fast-paced, adaptive environment, and have a love of innovation and using it to drive outstanding results. If you’re smart, creative, ambitious, and always looking for ways to learn and improve, we’d like to talk with you.

**INTERN, DATABASE ADMINISTRATION - JOB DESCRIPTION**

CliniComp, Intl. is looking for an Intern to work 15-20 hours per week on a project that will be used by our Account Management team. The project will include data collection, data analysis, and report generation. The specific duties will be to maintain links from a master database to external data sources, automate the data refresh process, and create an automated report generator. This is a very challenging project as it incorporates both database design and database administration into one role. The intern will work with a world class team of account and project managers to accomplish the project.

**Minimum Qualifications (knowledge and experience can be gained from classroom or professional environments):**

- Must be a student actively enrolled and working on his/her Bachelor’s or Master’s Degree in computer science or a related field.
- Knowledge of Microsoft Access, Oracle database, or SQL server database.
- Knowledge of backups, restores, and recovery models.
- Able to create shell scripts for task automation.
- Experience troubleshooting and resolving database integrity issues.
- Experience implementing operational automation.
- Knowledge of database design and database administration.
- Familiar with SQL query language.
- Very good skills utilizing Microsoft Office (Word, Outlook, Calendar).
