You are innovative – dynamic – forward thinking - passionate - challenging the norm. As industry leaders, our candidates must be self-motivated team players; problem-solvers who thrive in a fast-paced, adaptive environment who love innovative technology as much as creating it. If you’re smart, creative, ambitious, and always looking for ways to improve, we’d like to talk with you.

SOFTWARE ENGINEERING INTERN, REPORT DESIGNER TOOLS

Are you a college student looking for an enriching internship with one of the most innovative technology companies in the UCSD neighborhood in San Diego? Do you want to enhance your educational experience working on a cutting-edge product? Do you like the idea of taking the lead on running your project while working alongside company leaders? If you answered yes, then we want to hear from you!

CliniComp, Intl. is looking for a Software Engineering Intern to work on high-quality BIRT and HTML5 based report designer tools. You will work with a team of world class engineers, contributing to the overall design and architecture of products that support the current and next generation of electronic health records. The role will involve working effectively on an independent and team basis.

Minimum Qualifications:
- Enrolled in a Computer Science, Software Engineering, or related degree program.
- Work or classroom experience with Java and knowledgeable of JavaScript.
- Ability to work 20 or more hours per week, anytime Monday through Friday, between the hours of 9 am to 6 pm.
- Good analytical skills, with the ability to troubleshoot and problem solve.
- Ability to work well with others and to work independently.
- A passion for learning new technologies and methodologies.
- U.S. Citizenship with the ability to obtain a DoD ADP clearance and a VA High Risk Background clearance.

Preferred Qualifications:
- Knowledge of web-based / cloud-based services and software.
- Knowledge of Eclipse IDE/BIRT (Business Intelligence and Reporting Tools) plugin/Eclipse plugin.
- Knowledge of HTML5, SQL, JSON, and open source technologies based on open standards.
- Experience creating design tools.
