WANTED: Mobile Game Programmer

Do you have the passion and skill to create cool code in C/C++ or Objective C? Solve daunting problems? Push hardware to its limit of performance?

Do you love video-games? Know the difference between fun or flakey? Want to build something unique and awesome?

Do you want to work at a vibrant and successful mobile game developer in North San Diego County (2 minutes from the Ocean, 1 minute from the Deli, 30 seconds from the Pub)?

If so - then we want to hear from YOU about coming on board and joining our team here at Appy Entertainment!

Send a resume to jobs@appyentertainment.com immediately, if not sooner!
