UNDERGRADUATE OR GRADUATE STUDENTS WITH SOME PYTHON EXPERIENCE ARE WELCOME TO WORK PART-TIME WITH US FOR EXPERIENCE.
WITH SEVERAL MILLIONS TWEETS DAILY WE DEVELOP ALGORITHMS FOR STOCKS RECOMMENDATION, BASED ON TWEETS SENTIMENTS AND THE INFLUENCE OF TWEETS AUTHORS.

DR. MINH
9265 Dowdy, San Diego CA 92126
minhsp3@gmail.com
650-995-4007

Dr. Minh Duong-van, one of the founders of Chaos Theory graduated from Cornell University in Quantum Field Physics, and joined the faculty of Stanford University in 1973.

In 1999, Dr. Minh founded Network Physics in Palo Alto CA, an Internet monitoring and acceleration company. The company was built on an understanding of the physics of network infrastructures with non-linear interactions and network protocols. Dr. Minh recruited twelve colleagues from Stanford University and three Nobel Laureates, Dr. Murray Gell-Mann, Dr. Martin Perl and Dr. Ilya Prigogine and grew the company to 175 employees worldwide. After raising the initial $44 million in venture capital in 1999, the company was acquired in 2008.

The 2014 LinkedIn recommendation from David Jones SVP/GM Enterprise Data Protection, HP Autonomy says “I had the pleasure of working with Dr. Minh at Network Physics. Without question, he has one of the most fertile minds in Silicon Valley and an ability to recruit a top notch engineering team.”

In 2005, Dr Minh Duong-van founded Search Physics in Mountain View CA, a web search company, which was subsequently acquired by Metavana Inc. Metavana applies the physics principles of self-organizing systems of physics to human language. Metavana recruited Nobel Laureate Dr. Murray Gell-Mann as a Scientific Advisor to the company in 2010. Dr. Gell-Mann is a world leader in semantics and the origin of languages. He founded the concept and theory of Computational Linguistics which is now widely used in search and information retrieval among Analytics companies.
