Solekai Systems is looking for a QA Test Developer for a web service. Work will involve development of tests, test cases, and analysis of specifications and test results. The successful candidate will be self-motivated and proactive in quickly learning the complex system and subject matter and will have a strong foundation in test development. Solekai has a dynamic culture that is looking to add new team members who are flexible and ready for a fast paced and dynamic project oriented environment.

PRIMARY RESPONSIBILITIES:

- Design and implement test cases (REST / SOAP)
- Investigating/reproducing test failures
- Analyzing and reporting test results
- Assist third-party developers in troubleshooting their integrations with ecosystem APIs
- Design and development of test cases
- Participate in technical exchanges and reviews
- Effectively communicate testing activities and findings in oral and written formats

REQUIREMENTS:

- Strong background in testing web services, SOAP, REST, HTTP, XML
- Ability to understand and utilize API definitions and test new features
- Strong breadth of knowledge/experience working with automated and manual test systems
- Self-starter with ability to multitask and follow-through
- Ability to work independently as well as part of a team
- Strong communication skills
- Ability to extract information from technical specifications

EDUCATION:

- BS in Computer Science, Mathematics, or Physics preferred (or equivalent
• 2+ years of experience with developing API based tests using REST and SOAP
