This Statement of Work covers the need for the services of a college student(s) to provide technical and/or analytical support in the field of Computer Science for the Personnel Accountability and Assessment System (P AAS) project. P AAS is the Army, Navy and Air Force's primary tool for managing personal accountability, assessing the impact and tracking the recovery of personnel following an event. Events can be occurrences such as disasters or outbreaks; may vary in size; may have geographical or organizational impacts, and may be man-made or natural in origin. The contractor shall work on software and database solutions for the project.

Benefits Eligibility: Hourly with no benefits  
Time Base: Part-time, max of 20 hours per week  
Advertised Salary: $13.25 per hour
