Job Title: IT Intern - Summer 2015

Company Profile

Oceaneering is a global oilfield provider of engineered services and products primarily to the offshore oil and gas industry, with a focus on deepwater applications. Through the use of its applied technology expertise, Oceaneering also serves the defense and aerospace industries. Oceaneering's business offerings include remotely operated vehicles, built-to-order specialty subsea hardware, deepwater intervention and manned diving services, non-destructive testing and inspections, mobile offshore production systems, and engineering and project management.

Essential Duties and Responsibilities include the following. Other duties may be assigned.

Summer 2015 Internship positions at Oceaneering will provide opportunities to gain experience in the "real world" work environment. The student will typically be assigned a mentor who will direct their summer experience. Work or project assignments (some with strict deadlines to meet) will be commensurate with the student's academic background to take advantage of their expertise and provide real life application of their classroom knowledge. At the same time, opportunities will be provided for students to expand their knowledge outside the boundaries of their classroom.

The primary responsibility for this position is to assist in developing our automated test suite. This is a great opportunity to broaden programming knowledge in C# and experience the Selenium and NUnit framework. This position will also gain experience working directly with Developers and Project Managers to troubleshoot defects and solve complex test scenarios.

Responsibilities

- Assist in writing and maintaining automated test cases in C# using Selenium and NUnit frameworks
- Assist development engineers by participating in defect diagnosis
- Communication with developers and project managers to ensure quality delivery of product
- Basic programming skills (C# a plus)
- Must be able to read and understand detailed technical and business requirements
- Strong troubleshooting and problem solving skills
- Experience with Selenium and NUnit frameworks a plus

Education and/or Experience

- Authorized to work for any employer in the U.S. on a full-time, indefinite basis without need for sponsorship now or in the future
- Currently pursuing a Bachelor's degree with a major or minor in MIS, CS, IS, or Computer Engineering or other technology discipline
- Current enrollment in an accredited program
- Paper resumes will not be accepted. All job seekers must go to the web site to be considered for positions www.oceaneering.com/careers
