Video Creation Engineer
Job Tracking ID: 83072-173830
Location: San Diego, CA
Job Type: Full-Time/Regular
Date Updated: September 12, 2014
Years of Experience - External: 3-5

Job Description:
The Video Test Creation Engineer will create sets of files to be used for testing digital video systems. Source files are written in XML and tested using tools developed in-house as well as standard tools such as VLC and hex editors. In addition, some transcoding of video and audio using standard industry tools will be required. The successful candidate will have the ability to work independently, to think critically, and be readily adaptable to changing priorities.

Qualifications:
- 3+ Years experience using XML
- Understanding of XML schemas
- Knowledge of Video and Audio Codes a plus
- BS in Computer Science, Electrical Engineering, Physics, Math, Technical Degree or Equivalent Work Experience
