Employer: SOLUTE Consulting  
Division: N/A  
Title: IT Intern  

Description: SOLUTE is seeking a part time IT Specialist Intern to work part-time to provide basic IT functions in support of corporate users. Work will be split between multiple corporate offices and will include installation/maintenance of equipment, user account management, and basic network configuration.

Potential networking includes local area network (LAN), wireless networks, and virtual private networks (VPN) using a wide variety of physical layer networking technologies.

The ideal candidate will have an understanding of various operating systems, encryption, printers, workstation trouble shooting, and systems security concepts (antivirus, malware, spyware).

SOLUTE is looking for highly motivated individuals who are concurrently enrolled in an accredited university and are interested in applying and honing their skills in fast paced corporate environment that provides cutting-edge solutions. Fruits of the labor will allow corporate users to solve important problems relevant to our nation’s security.
