Web Application Development for San Diego Cricket Club

Abstract

In this thesis, a web application is developed for the San Diego Cricket Club (SDCC) which shall help in promoting interest about cricket as a sport in San Diego, as well as serve the Club. SDCC is a place for a cricket enthusiast, either a beginner or a professional, to interact and share knowledge about cricket. This web application uses a web-based system to let prospective members get information about the Club and interact with each other via a fully functional blog. Blog features include user generated content consisting of up to date announcements/information about the Club and interesting happenings around San Diego concerning cricket.
